

System bypass Preset A & Preset B Troubleshooting Document

Home Screen. Press **Count** button.

Count Screen. Verify system is in **Count Lengths** mode and not **Count Labels** mode. Then press **Continue Setup** button.

Once you have verified the system is in **Count Lengths** mode, verify that the system is in **Bypass Preset Counts is Off**.

Now set your **Preset A** and **Preset B**. Run the system and it should slow down to idle speed at **Preset A** then stop at **Preset B**.
