Splice Detector System Option

FEATURES:

- The Splice Detector will detect the glossy surface of most splicing tapes regardless of color!
- Detection device is mounted directly onto the rewind system (see figure to the right) and will stop the machine automatically upon detection of a splice.
- The HMI touch screen will indicate when a splice has been detected. The system must be cleared before running the roll can resume.
- Factory set sensitivity adjustment will detect most known splice materials, while allowing for manual adjustments to be made for individual requirements.
- The Splice Detector can also function as an automatic roll-end shut-off or can be turned off when not needed.
- The Splice Detector can be mounted on the front or back of the web.

To learn more about Web Techniques Splice Detector or any of our other revolutionary products, visit our website at webtechniquesinc.com.

INTEGRATED SPLICE DETECTOR OPTION

This is my pledge to our customers. If it is not right we will make it right. We follow the Golden Rule at Web Techniques and treat others as we would want to be treated. If you ever have any questions or concerns about a Web Techniques product or service feel free to contact me directly. Thank you for your business!
