The Web Techniques Data Logging HMI Option is designed to be added to any WT-30 or WT-35 Rewind System. The Data Logging option allows users to:

- Date and Time Stamp Roll Runs.
- Record user information.
- Record Label Count information.

All of this information is documented and saved as a CSV file to a removable SD card that can be accessed via a SD to USB card adapter. Once the data is downloaded to a PC with a spreadsheet program (Microsoft Excel, example file pictured below) the data can be saved and manipulated for storage on your network.
